

Privacy:

According to the privacy policy of Studitute Portal, information is collected, processed and protected regarding its users as follows. It involves name and contact details of users, students' records, contact information of visitors, browsing history, and their interests. This information is then utilised for service customisation, user education program enrolment, targeted communications, and for study intended to improve the platform.

The collected data may be disclosed to educational institutions, service providers and other third parties where such disclosure is necessary in order to provide services or where it is required by law, respectively. Studitute Portal uses strong security features to ensure that individual information and identity cannot be accessed and hacked.

The data subjects have rights that are provided with the data protection legislation, including the GDPR, and they have the right to request, access, rectify, erase or limit their data. Exercise of the rights is often done through the portal as is described in the Privacy Policy. The policy also notes that users of Studitute Portal shall be protected from privacy invasion in compliance with the data protection laws and regulations.
